Unboxing

Carefully remove all packaging materials and take the appliance out of the box.

This product has been manufactured with high quality materials and components, which can be recycled or reused. Do not dispose of this product and it's packaging as unsorted municipal waste. Use your local framework for collection of electrical and electronic equipment for return, recycle and recovery to minimize any effects on the environment or on human health.

What's in the box: Scent Creator, power cord, basket, quick start guide and warranty.

Accessories

Scent cartridges, door covers, bottles and other accessories may not be included and must be purchased separately.

Personalize your Scent Creator with the door cover design that best suits your style.

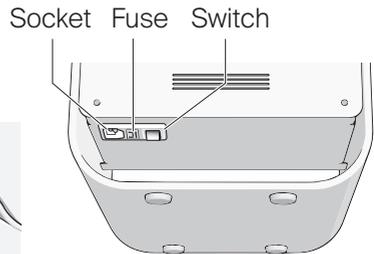

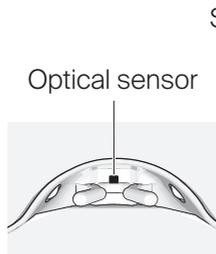

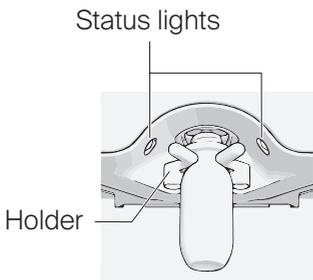

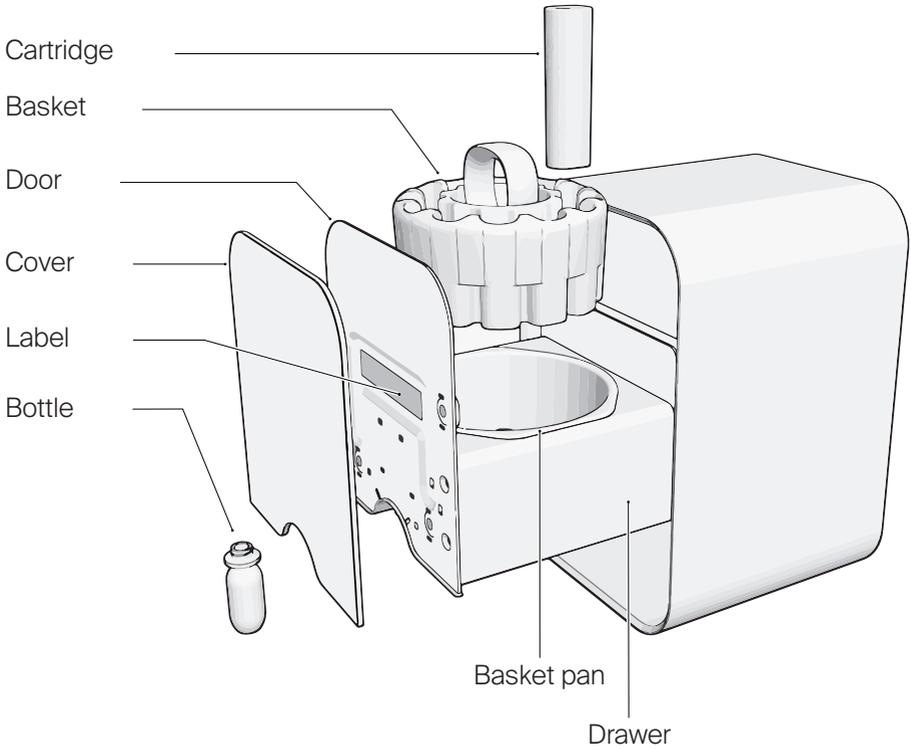

Collect as many scent cartridges as you like. The more you have, the more creative possibilities you will have.

Formula bottles are available in different sizes and come in kits.

Remote Control

The Scent Creator is wirelessly controlled by an app which must be installed in your smartphone before the appliance can be used. The free app is available for Android and iOS.

Overview

SAFETY INFORMATION

Appliance Safety

- The Scent Creator is intended only for domestic use. As reference, a normal use would be a monthly production of about 70 ml of fragrance over a period of 10 years. Other uses may void the warranty.
- Cleaning and user maintenance shall not be done by children without supervision.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children shall not play with the appliance.
- Incorrect repairs are dangerous. Repairs may only be carried out by one of our trained after-sales technicians.
- This appliance is supplied with a power cord suitable for your country. Use only the supplied power cord. To avoid damage do not walk on it, pinch or twist it unnecessarily. If it becomes damaged replace it immediately or contact our Customer Service.
- This appliance is equipped with a fuse for protection. If the fuse blows it must be replaced with the same type with a 2A rating.
- If the appliance is defective, unplug it from the mains or switch off the circuit breaker in the fuse box. Contact Customer Service.
- This appliance must be placed in an upright position on a flat level surface. It relies on gravity to keep some components in place as well as to avoid spilling liquids.
- Use only original The Alchemist Atelier door covers.
- Do not open the door with a bottle in the holder. Remove the bottle from the holder before opening or closing the door to prevent it from falling.
- Do not remove the bottle from the holder when the appliance is operating. Wait until you hear that it has finished working to remove the bottle.

- Do not open the door if you hear the Scent Creator is operating. Wait until you hear that it has finished working, then open the door.
- When the drawer is out do not push down on it too hard, as it may tip over the appliance.
- Do not obstruct the ventilation slots in the back of the appliance. Although very little heat is produced inside, ventilation is required for proper operation.
- There is an optical sensor behind the bottle holder. Keep it clean so that it can detect the presence or absence of a bottle. This is necessary for proper operation of the appliance.

There are no user serviceable parts in the appliance. Please refer all repairs to our Customer Service. For basic troubleshooting go to page 12 in this guide.

Safety of Scents and Fragrances

- Use only original The Alchemist Atelier scent cartridges and formula bottles.
- Do not poke into the cartridge openings or otherwise tamper with them. The Scent Creator keeps a precise count of the amount of scent dispensed and tampering could alter the content and lead to erroneous estimations.
- Check the safety warnings printed on each cartridge regarding alcohol and other scent ingredients. Make sure you are not allergic to any of them.
- The formulas produced in the appliance are for external use only. Apply to wrists and neck for optimum results. Do not swallow.
- Legal information about the ingredients for each formula created with the app will appear in each formula's record. See the app for details.
- When not in use, do not leave a formula bottle in the holder. It could be accidentally bumped out of the holder, or it could fall if the appliance is moved. Additionally, any formula in the bottle could evaporate.

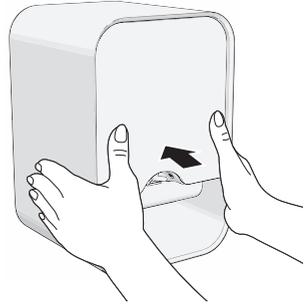

USING THE SCENT CREATOR

Preparing the Appliance

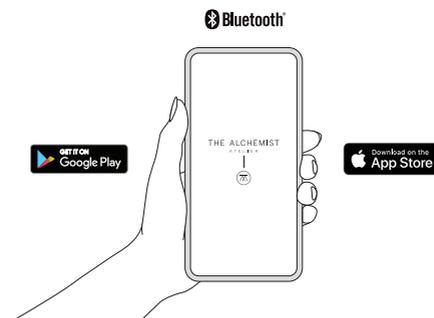

To begin using the Scent Creator make sure you have scent cartridges, empty formula bottles and a door cover.

1. Open the door by pushing on both sides of the bottom half of the door. It will click open, then you can pull the drawer out all the way.
2. If this is your first use, remove any protective packaging. Remove the cardboard protective cover from the door and attach your new cover. Magnets will hold it in place.
3. Insert scent cartridges into empty slots in the basket. When inserting a cartridge into the basket make sure it goes in all the way.
4. Push the drawer in and close the door by pushing on both sides of the bottom half until it clicks shut.
5. Connect the supplied power cord to the socket located at the rear.
6. Plug the power cord into the mains.
7. Turn on the power switch located at the rear. If this is your first use the status lights will blink indicating that a Bluetooth connection is needed.

Pairing your Smartphone

You will only need to do this once. Your devices will remember the pairing afterwards.

1. Install the Alchemist Atelier app on your smartphone. Open the app and select the pairing feature.
2. Make sure the Bluetooth function is activated on your smartphone.
3. When prompted, enter the pairing code that is printed on the label on the door. Remove the door cover to see the label. The status lights will stop blinking when the pairing is complete.
4. Put the cover back on the door and close it.

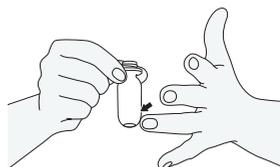

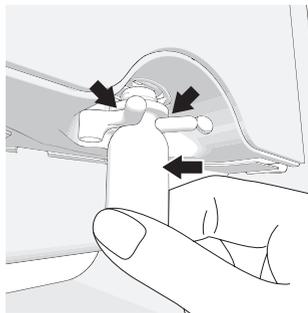

Status Lights

The status lights indicate the status of the Scent Creator and are useful for knowing what it is doing and if it's waiting for an action from the user. The following table explains the meaning of the indications:

<i>Lights</i>	<i>Status</i>
Blue	Waiting for an action by the user. Possible user actions: <ul style="list-style-type: none"> • pairing with a smartphone • inserting a cartridge • placing a bottle in the holder • closing the door • remove bottle of finished formula
White	Ready to mix / mixing formula
Yellow	Software upgrade
Red	Basket drive error. For troubleshooting please follow the instructions on page 12
Purple	Cartridge dose error. For troubleshooting please follow the instructions on page 12

Making your Formula

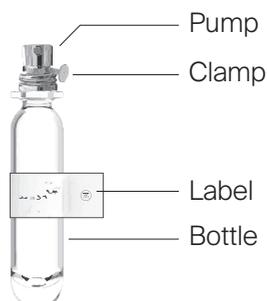

1. Put an empty bottle in the holder. Make sure the capacity matches the amount of formula you want to make, otherwise the liquid could overflow. Always use an empty bottle for each formula. If there is any left in the bottle and you make more it could overflow.
2. Play with the app mixing your own formulas or using popular formulas shared by other users. Our growing user community is a great source for inspiration where you can also share your creations. Follow the instructions in the app.
3. When the bottle has been filled, remove it from the holder. To mix well your newly made formula don't shake it briskly, just tap the bottle with your fingers.
4. Screw the pump onto the bottle as soon as possible to preserve the formula's properties. To avoid cross-contaminating your formulas, you should always use a new pump for each new formula.
5. Remember to turn off the switch when you have finished.

Collecting Scents and Formulas

Each basket can hold up to 12 cartridges but there are many more available scents. You can keep scent collections in different baskets so you will easily have them ready to produce your favorite formulas. This way you can simply swap baskets to quickly have together all the scents you need for a formula.

Put a label on each bottle to identify your formulas. When travelling or to prevent the pump from being pushed accidentally, put on our special clamp.

MAINTENANCE

Scent Cartridges

Always keep enough scent cartridges to produce your favorite formulas, replacing them as they become empty. If all the cartridges in the basket are empty the appliance can't produce any formula.

You can find all the currently available scents in the app.

Remember to return your used empty cartridges for recycling.

Cleaning

Keep the appliance clean by wiping the visible surfaces with a clean damp cloth. The area below the bottle holder is the most likely to collect drops or dust.

To clean the door cover more comfortably you may remove it from the door.

The optical sensor behind the bottle holder must be kept clean. Wipe with a clean damp cloth as needed.

The basket pan should be cleaned with a damp cloth if any scent drops fall on it. To do so, open the door and remove the basket.

The basket may also be wiped with a clean damp cloth.

If necessary, you may remove a cartridge and wipe it with a clean damp cloth. Avoid touching any of the openings! Then put it back in the basket.

To reuse bottles, we recommend washing with water and detergent (in dishwasher or by hand), only when they are empty, and let dry completely before adding a new formula.

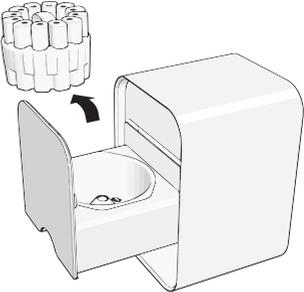

The bottle pump should not be washed, always replace for each new formula.

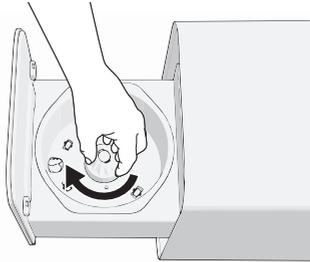

To avoid damaging the Scent Creator, do not use the following materials for cleaning:

- abrasive or corrosive cleaning products
- cleaning products with a high alcohol content
- hard scouring pads or sponges
- high pressure water or vapor cleaning machines
- hot cleaning products

TROUBLESHOOTING

The following table lists common problems you may find and their solutions:

<i>Symptom</i>	<i>Possible cause</i>	<i>Solution</i>
The appliance won't turn on (status lights are off)	The power cable is loose	Check that both ends of the cable are plugged in properly
	The fuse has blown	Replace the fuse (2 A)
The Bluetooth pairing fails (status lights show a blue gradient)	Your smartphone Bluetooth function is off	Turn on the Bluetooth function on your smartphone
	Your smartphone is not visible for pairing	Make your smartphone visible in the Bluetooth settings
	There is a strong radio interference	Turn off other Bluetooth or Wi-Fi devices, or move them away
I hear the machine working but it stops without making any formula (status lights show a blue gradient)	The cartridges are empty or there are no cartridges in the basket	Replace the scent cartridges.
Basket error (status lights show a red gradient)	The basket drive is not engaged properly	<p>1. Remove the basket.</p>  <p><i>(continue on next page)</i></p>

<i>Symptom</i>	<i>Possible cause</i>	<i>Solution</i>
		<p>2. Turn the basket drive in the bottom of the basket pan to the next stop.</p>  <p>3. Insert the basket and close the door. If the problem persists repeat the procedure.</p>
Cartridge dose error (status lights show a purple gradient)	A cartridge is not dosing properly	Switch off the appliance and then switch it on again
